SENIOR CAPSTONE OUTCOMES Information Technology

<School> CORE OUTCOMES

All <School> Capstones will show that students can:

1. Identify personal career options and educational pathways based on understanding of personal interests, abilities, and future job market projections.
2. Demonstrate personal and professional behaviors that contribute to employability and post-secondary educational success.
3. Work individually and collaboratively to manage and complete work projects.
4. Use research skills to develop and maintain personal, professional, and technical competence.
5. Communicate effectively with diverse audiences through oral presentations, written texts, and graphic media.

INFORMATION TECHNOLOGY PROGRAM SPECIFIC OUTCOMES

Information Technology Capstone projects will show that students can:

1. Approach information technology problems from a systemic perspective.
2. Demonstrate technical proficiency in selected current and emerging technologies.
3. Maintain and upgrade selected information technology tools and systems.
4. Design, plan, and complete information technology projects to meet a client's needs.
5. Apply information technology concepts and skills in vastly different industry groups and organizations.
